CAREER PROFILE

Results-driven **Computer Science** undergraduate with hands-on experience in **AI/ML research**, data analysis, and full-stack development. Proven success in developing scalable solutions and delivering impactful projects using Python, TensorFlow, SQL, and cloud platforms. Passionate about innovation and problem-solving with a strong foundation in algorithms, systems design, and cross-functional collaboration.

EDUCATION

University of North Texas | Denton, TX

Expected May 2025

Bachelor of Science | Computer Science

GPA: 3.88

Certified Specialization in Artificial Intelligence

Relevant Coursework: Machine Learning, Deep Learning, Data Structures, Algorithms, Computer Vision, Natural Language Processing, Software Engineering, Database Systems, Operating Systems, Cloud Computing, AI Ethics

TECHNICAL SKILLS

Software: Python, TensorFlow, PyTorch, Scikit-learn, OpenCV, SQL, Git, Docker, Kubernetes, AWS, GCP, Azure, Visual Studio Code, Jupyter Notebook, Tableau, Power BI, Linux, Postman, MongoDB

Programming Languages: Python (Advanced) | C++ (Interm.) | Java (Interm.) | JavaScript (Interm.) | HTML/CSS (Interm.) | SQL (Interm.) | Bash (Beginner) | R (Beginner)

Hardware & Systems: Raspberry Pi | Arduino | NVIDIA Jetson | ESP32 | Digital Multimeters | Logic Analyzers | Oscilloscopes | Breadboarding | Soldering | Multicore CPUs | GPU Computing (CUDA)

Operating Systems: Windows | Linux | MacOS | Android

Certifications: Deep Learning Specialization – Coursera | Google IT Automation with Python | AWS Cloud Practitioner | TensorFlow for AI – Coursera | Azure AI Fundamentals (AI-900) | Google Data Analytics: Data Foundations

ENGINEERING PROJECTS

Adversarial Perbutations of LLMs (NLP Research, Python, Hugging Face)

May 2025 – Ongoing

Conducting adversarial attacks (TextFooler, BERT-Attack) on fine-tuned BERT models to assess reasoning robustness using BigBenchHard benchmarks. Working under **Prof. Sagnik Ray Choudhury (UNT AI Research)** to develop token-level evaluation metrics and human-aligned scoring models.

Racial Classification with CNNs on UTKFace (Python, TensorFlow)

Jan 2025 – May 2025

Trained a custom CNN (no pretrained backbone) on 45,000+ UTKFace images to classify racial categories, achieving over 90% validation accuracy. Worked under **Prof. Tanmay Bera (UNT)** and optimized model using data augmentation, regularization, and dropout techniques.

Face Generation with DCGAN (PyTorch)

Implemented a Deep Convolutional GAN on CelebA-HQ (256x256 resolution) to generate synthetic human faces. Used FID score to evaluate realism and trained with progressive batch sizing for training stability.

PROFESSIONAL EXPERIENCE

Resident Life Advisor, University of North Texas — Jan 2024–Present

Jan 2024 – Ongoing

- Support 50+ residents by fostering community engagement, resolving conflicts, and organizing inclusive campus events.

INTERNSHIP/RESEARCH EXPERIENCE

AI Research Intern, University of North Texas — May 2025–Present

May 2025 – Ongoing

- Conducting adversarial robustness research on LLMs under Prof. Sagnik Ray Choudhury using BERT-Attack and TextFooler on BigBenchHard.

LEADERSHIP & PROFESSIONAL STUDENT ORGANIZATIONS

Google Developer Student Club (GDSC – UNT Chapter)

Aug 2023 – Present

National Society of Leadership and Success (NSLS)

Aug 2024 – Present
